Diagram illustrating the structure of an LLC PDU (Protocol Data Unit) within an Ethernet frame:

- The PDU is represented as a sequence of octets, numbered 1 through 8 (from right to left).
- Octet 1 is divided into two fields:
 - FBI=1** (Frame Break Indicator, bits 7-8)
 - E=0** (Escape, bits 1-2)
- Octets 2 through 255 (labeled as Octet N2) contain the **LLC PDU 1** data.
